SUPER SCENE

NEW FX

LIVE MIXER

myDMX 5 NEW SOFTWARE FEATURES:

- Re-built from the ground up with a fresh new look
- **Super Scene:** Combine your different scenes on the timelines of a Super Scene and easily create complex and perfectly timed scenes with perfect precision. Change one of the source scenes and your Super Scene will be automatically updated.
- **New FX:** Create impressive effects on any type of channel, and even map them in 2D. Combine an unlimited number of effects with a Super Scene timeline.
- **Live Mixer:** Control the dimmers of each group directly in the new Live mixer rack. Trigger the strobe, a blinder, change the colour... also from the Live mixer.
- **Live Playback:** Control Dimmer, speed, phase shift, and size directly with the new live rotary encoders available for each scene. Play your scenes forwards, backwards, or both ways. Divide your scenes into segments which can be jumped between with a GO button or BPM.
- **Music Sync:** Synchronize your show with the music BPM using tap-tempo, MIDI clock or Ableton Link. React to the music pulse with line-in audio. Divide scenes into a number of beats of your choice to sync in harmony with tricky tempos!
- **Touch:** Create a custom screen layout to use on a touchscreen, or link with an iPhone, iPad or Android device over WiFi. Perfect for mobile control and for installations.
- **Mapping Modes:** Switch the entire software to mapping mode, allowing you to link any control to your keyboard, MIDI controller, or DMX console in one click!
