

Turn any computer into a powerful lighting control Centre

Architectural & Installation

Complete range of lighting controllers with a powerful stand alone mode

TOUCH 512 / 1024

Tactile wall mounted DMX controller

TOUCH PANEL

- Sleek RGB/W/A and CTO colour wheel, brightness and Cool/Warm White selection
- 1024 model controls up to 5 zones simultaneously
- Rear plate compatible with European, American, and Asian mounting hardware

CQSA-E 1024 / PRO

Ethernet to DMX stand alone interface with LAN and Internet access

WEB REMOTE

- Remote programming and firmware update
- Commands and configurations with the Wi-Light 2 mobile app
- UDP protocol for third-party software triggers
- A 6-in-1 multi-protocol stand alone device
- Artnet/sACN recording on µSD and Stand Alone playback

CQSA & SLIM 512 / 1024

Versatile Stand Alone and easy to use wall mounted DMX interfaces

- 1024 model controls up to 5 zones simultaneously
- Micro SD card slot and internal memory for saving shows
- Numerous triggers: RS232, smart contacts, infrared optional (requires the IR Kit), Time clock
- Durable mechanical buttons with pleasant blue LED

DIN-E 512 / 1024 / 2048

Ethernet stand alone interface for DIN rails

WEB REMOTE

- Numerous triggers: RS232, UDP, Ethernet, smart contact, infrared, Time clock
- 2048 model controls up to 10 zones simultaneously
- 4 DMX ports for managing 1, 2 or 4 Universes
- NODE, Art-Net/sACN to DMX decoder for 4 universes

Turn any computer into a powerful lighting control Centre

Live and Entertainment

Complete range of lighting controllers coupled with powerful software

CLUB 128 / 512

Cost-effective USB to DMX interfaces for small lighting projects

CLUB-E 1024

New Ethernet to DMX interface easily connects to LAN networks

POWER 5-18V DC

- 128 or 512 channels of Live control or Stand Alone playback
- Infrared receiver (Remote control included with CLUB 512)
- 3 trigger options by dry contacts
- 5-18V DC Input on Terminal Block

WI-LIGHT LAN

- 2 Universes of DMX and Art-Net or sACN
- Up to 128 interfaces connected to Local Networks
- 30 minutes Audio and Video timeline from software
- NODE mode (Art-Net or sACN to DMX decoder)
- Stand Alone Wi-Light 2 APP control on LAN

PRONET-E

Ethernet interface that unlocks all software options

PIXXEM-E 128 / 255

Ethernet interface for large projects

- Unlocks 16 Universes of Art-Net or sACN
- 24h Audio and Video timeline
- Unlocks 64 Universes when connected to PIXXEM pixel mapping software
- Enables Midi Time Clock, PC Clock & Calendar, and Timeline Live record features

- Unlocks 64 Universes of Art-Net or sACN
- Unlocks 128 or 255 Universes when connected to PIXXEM pixel mapping software
- DVI resolution up to 1280 x 1024 (1,310,720 pixels)
- Send Art-Net and sACN in unicast or broadcast or multicast
