

**G007NL**  
**Professional Heavy Duty 1RPM Mirror Ball Motor**  
**For mirror balls up to 50kg and 48" Diameter**

**FITTING & MAINTENANCE INSTRUCTIONS**

**IMPORTANT**

Installer and Users please note:

These instructions should be read carefully and left with the user of the product for future reference.

## BEFORE USE

You must inspect the product including its mains lead for any signs of damage. If the product is damaged, DO NOT use it, and contact your supplier immediately.

## PRODUCT SAFETY

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- For indoor use only.
- Do not use in bathrooms, or in wet or damp locations.
- Do not place the mains lead beneath a carpet or rug.
- For use only with mirror balls up to 50kg and 48" Diameter
- Professional install use only

## INSTALLATION

This product MUST only be installed by a professional person after completing a site survey of the ceiling to which the mirror ball will be fixed to. It is the responsibility of the installer to make sure that the correct fixings are used for the type of ceiling the product is to be attached to (not supplied). This product is designed to work only with mirror balls up to 50kg with a maximum diameter of 48". Make sure that the mounting flange is completely horizontal and the attached mirror ball hangs at right angles to the ceiling. The mirror ball must be attached to both the main hanging point and the safety point using the appropriate fixings (not supplied) Power to the product is via the IEC connector on the side of the product. This must be done by a qualified electrician. Do not connect the mirror ball motor to the output of a dimmer. It is not possible to vary the speed of the motor.

## MAINTENANCE

- If the mains lead is damaged, it must be replaced by the manufacturer or an authorised service centre.
- If the mains plug needs to be replaced, proceed as follows:
- Connect the brown wire to the terminal labelled "L".
  - Connect the blue wire to the terminal labelled "N".
  - Connect the green/yellow wire to the terminal labelled "E" or with the earth symbol.
  - Make sure that the cord-grip is positioned correctly (over the outer sheath of the cable) and is fully tightened.

## PERIODIC SAFETY INSPECTION

## PAT TESTING

When used in a workplace, this product should be safety-tested yearly by a qualified electrician (PAT Tested). We recommend that it is PAT tested regularly when used in a domestic environment.
