

JTS IE-1

High Definition DynaDriver Earphones

Features and Overview

The JTS IE -1 DynaDriver earphones reproduce fully detailed sound with natural mids, smooth highs and tight bass.

Designed for use with the JTS SIEM 101 in ear monitoring system, the JTS IE -1 earphones can also be used with other manufacturers in ear monitoring systems as well as the Apple Ipod, MP3 players and portable CD players.

Three pairs of silicon sleeves are provided in 3 different sizes (S, M, L) assuring a right fit for the user.

The comfortable silicon sleeves ensure hours of use without fatigue.
