Spectra Batten
(Exterior)
(Order code: LEDJ76)

WARNING

**FOR YOUR OWN SAFETY, PLEASE READ THIS USER MANUAL CAREFULLY
BEFORE YOUR INITIAL START-UP!**

CAUTION!

**Keep this equipment away from rain,
moisture and liquids.**

SAFETY INSTRUCTIONS

Every person involved with the installation, operation & maintenance of this
equipment should:
-        Be competent
-        Follow the instructions of this manual

**CAUTION! TAKE CARE USING THIS EQUIPMENT!
HIGH VOLTAGE-RISK OF ELECTRIC SHOCK!!**

Before your initial start-up, please make sure that there is no damage caused during
transportation. Should there be any, consult your dealer and do not use the
equipment.

To maintain the equipment in good working condition and to ensure safe operation, it is necessary
for the user to follow the safety instructions and warning notes written in this manual.

Please note that damages caused by user modifications to this equipment are not
subject to warranty.

IMPORTANT:

**The manufacturer will not accept liability for any resulting damages caused
by the non-observance of this manual or any unauthorised modification to the
equipment.**

- Never let the power-cable come into contact with other cables. Handle the power-cable and all mains voltage connections with particular caution!
- Never remove warning or informative labels from the equipment.
- Do not open the equipment and do not modify the equipment.
- Do not connect this equipment to a dimmer-pack.
- Do not switch the equipment on and off in short intervals, as this will reduce the system's life.
- Only use the equipment indoors.
- Do not expose to flammable sources, liquids or gases.
- Always disconnect the power from the mains when equipment is not in use or before cleaning! Only handle the power-cable by the plug. Never pull out the plug by pulling the power-cable.
- Make sure that the available voltage is between 220v/240v.
- Make sure that the power-cable is never crimped or damaged. Check the equipment and the power-cable periodically.
- If the equipment is dropped or damaged, disconnect the mains power supply immediately. Have a qualified engineer inspect the equipment before operating again.
- If the equipment has been exposed to drastic temperature fluctuation (e.g. after transportation), do not switch it on immediately. The arising condensation might damage the equipment. Leave the equipment switched off until it has reached room temperature.
- If your product fails to function correctly, discontinue use immediately. Pack the unit securely (preferably in the original packing material), and return it to your Prolight dealer for service.
- Only use fuses of same type and rating.
- Repairs, servicing and power connection must only be carried out by a qualified technician. THIS UNIT CONTAINS NO USER SERVICEABLE PARTS.
- WARRANTY; One year from date of purchase.

OPERATING DETERMINATIONS

If this equipment is operated in any other way, than those described in this manual,
the product may suffer damage and the warranty becomes void.

Incorrect operation may lead to danger e.g.: short-circuit, burns, electric shocks,
lamp failure etc.

Do not endanger your own safety and the safety of others!
Incorrect installation or use can cause serious damage to people and property.

The outdoor DMX Spectra Batten together with the IR remote control can produce colourful and dynamic lighting effects. It can be used in a wide variety of venues and for outdoor building illumination.

Remote control:

Operation

1, **"BLACK OUT"** button, sets the Spectra Batten power to **ON** or **OFF**.
2, Button **A**, sets the Spectra Batten to **Auto run** mode.
3, **"PROG"** button, sets the Spectra Batten to run it's built-in programmes.
   Selectable programmes are: 7 colour selections, colour change or colour mix this is done by using the **"+ and -"** buttons.
4, "**F**" button, sets the Spectra Batten to flash. To increase or decrease the speed of the flash use the **"+ and -"** buttons.
5, **"SP"** button, sets the Spectra batten's running speed. This button is only available in the Colour change or Colour mix mode. To increase or decrease the speed use the **"+ and -"** buttons.
6, **"D"** button, sets the Spectra Batten into DMX mode.
7, **"SA" Sound acivation is only available on the "indoor" version.**
8, **"SL"** button, sets the Spectra Batten into Slave mode.
9, **"R" "G" "B" "+"** and **"-"** buttons set the brightness for the R,G,B LED's.
10, **"S" "0" "1" "2" "3" "4" "5" "6" "7" "8" "9"** buttons, sets the DMX address.

For example to set the DMX address **"245"**

    a) Press the **"S"** button, then all of Red LED's come on, this means you can start to set the DMX address

    b) Press the **"2"** button and all of the Green LED's come on, this shows the **2** in the **245** DMX address has been entered

    c) Press the **"4"** button and all of the Blue LED's come on, this shows the **4** in the **245** DMX address has been entered

    d) Press the **"5"** button and all of the R,G,B LED's come on, this shows the **5** in the **245** DMX address has been entered

    e) Press the **"D"** button to start the DMX operation

Example 2: Set DMX address **"001"**

    a) Press the **"S"** button, then all of Red LED's come on, this means you can start to set the DMX address.

    b) Press the **"0"** button, and all of the Green LED's come on, this shows the **0** in the **001** DMX address has been entered

    c) Press the **"0"** button, and all of the Blue LED's come on, this shows the **0** in the **001** DMX address has been entered

    d) Press the **"1"** button, and all of the R,G,B LED's come on, this shows the **1** in the **001** DMX address has been entered

    e) Press the **"D"** button to start the DMX operation

Note: The IR remote will not function when the Spectra Batten is controlled by a DMX controller.

Exterior Batten 5 channel operation:

Channel	Function
1	Red LED dimmer
2	Green LED dimmer
3	Blue LED dimmer
4	Master dimmer (must be up for channels 1,2,3 to work)
5	Strobe speed

Notice:
• Be sure to follow figures 2 & 3 when making your own cables. Do not connect the cable's shield conductor to the ground lug or allow the shield conductor to come in contact with the XLR's outer casing. Grounding the shield could cause a short circuit and erratic behaviour.

FIGURE 3

XLR Pin Configuration
Pin 1 = Ground
Pin 2 = Negative
Pin 3 = Postive

FIGURE 2

Special Note: Line termination:
 • When longer runs of cable are used, you may need to use a terminator on the last unit to avoid erratic behaviour.

Termination reduces signal transmission problems and interferance. it is always advisable to connect a DMX terminal, (resistance 120 Ohm 1/4 W) between pin 2 (DMX-) and pin 3 (DMX+) of the last fixture.

Using a cable terminator (part number CABL90) will decrease the possibilities of erratic behaviour.

5-Pin XLR DMX Connectors:
 • Some manufactures use 5-pin XLR connectors for data transmission in place of 3-pin. 5-Pin XLR fixtures may be implemented in a 3-pin XLR DMX line. When inserting standard 5-pin XLR connectors in to a 3-pin line a cable adaptor must be used. The Chart below details the correct cable conversion.

3- Pin XLR to 5-PIN XLR Conversion		
Conductor	**3-Pin XLR out**	**5-Pin XLR in**
Ground shield	Pin 1	Pin 1
Negative (-)	Pin 2	Pin 2
Positive (+)	Pin 3	Pin 3

Spectra Batten Specifications

• Input power: AC240v~50Hz
• Power consumption: 30w
• LED's: 240 ultra bright 10mm LED's (R: 48, G: 102, B: 90)
• Beam angle: 40 degree
• IP rate: IP44
• Dimensions: 1000 x 80 x 75mm
• Weight: 4.2Kgs

IR Remote Specifications

• Dimensions: 110 x 46 x 6.9mm **(L x W x H)**
• Battery: 3V button battery (CR 2025)
• Maximum IR remote transmitting distance 10M
