### ALPHA M8 MID/HI

*The ALPHA M8 is an advanced high power, medium-Q Mid/Hi module that has the same form factor as the high-Q M3, allowing user selectable dispersion characteristics appropriate to the application. The M8 uses two exponential horn loaded 10" MF drivers and a constant directivity horn loaded 3" HF driver giving 75° x 45° dispersion, the horn may be rotated with the wider dispersion in the horizontal or vertical plane. Operated as a 2-way active system for ultimate performance and control, the ALPHA M8 has a frequency response of 190Hz- 19kHz. Stacked or flown in arrays together with an ALPHA B1 Bass, the ALPHA M8 delivers outstanding performance as part of a precision, compact, large scale system.*

*The ALPHA System is a range of advanced technology modular, compact, high power loudspeaker modules tailored for a wide range of touring and installed sound reinforcement applications, from clubs and theaters to large scale live events. Like all NEXO products, ALPHA System components are designed to work with advanced electronic processors, guaranteeing consistent performance and reliability of the highest standard.*

High power Mid/Hi module 143dB peak SPL @ 1m) using advanced co-axial waveguides with multipath phase devices.

Horn loaded 2 x 10" MF and 1 x 3" HF components on medium-Q waveguide provide 75° x 45° dispersion for medium throw applications, frequency response 190Hz-19kHz. User configurable, rotatable horn.

Active 2-way operation with NX242 Digital TDcontroller ensures reliable, linear operation.

Baltic birch cabinet and high performance honeycomb composite construction.

Available in dark grey carpet covering or textured black paint.
