

## **USER MANUAL**

**ENGLISH** 

Cameleon Spot 7 Q6

**V1** 

Product code: 42665

## **Preface**

Thank you for purchasing this Showtec product.

The purpose of this user manual is to provide instructions for the correct and safe use of this product.

Keep the user manual for future reference as it is an integral part of the product. The user manual shall be stored at an easily accessible location.

This user manual contains information concerning:

- Safety instructions
- Installation and operation of the device
- Intended and non-intended use of the device
- Maintenance procedures
- Troubleshooting
- Transport, storage and disposal of the device

Non-observance of the instructions in this user manual may result in serious injuries and damage of property.

## 1. Introduction

## 1.1. Before Using the Product

**Important** 

Read and follow the instructions in this user manual before installing, operating or servicing this product.

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual.

After unpacking, check the contents of the box. If any parts are missing or damaged, contact your Highlite International dealer.

Your shipment includes:

- Showtec Cameleon Spot 7 Q6
- Schuko to Power Pro True cable (1,5 m)
- Quick-lock bracket
- User manual

Fig. 01

## 1.2. Intended Use

This device is intended for professional use as a professional outdoor wall washer. It is not suitable for households and for general lighting.

Any other use, not mentioned under intended use, is regarded as non-intended and incorrect use.

## 1.3. Product Lifespan

This device is not designed for permanent operation. Disconnect the device from the electrical power supply when the device is not in operation. This will reduce the wear and will improve the device's lifespan.

## 1.4. LEDs Lifespan

The light output of the LEDs gradually decreases over time (lumen depreciation). High operating temperatures contribute to this process. You can extend the lifespan of the LEDs by providing adequate ventilation and operating the LEDs at the lowest possible brightness.

#### 1.5. Text Conventions

Throughout the user manual the following text conventions are used:

Buttons: All buttons are in bold lettering, for example "Press the UP/DOWN buttons"

References: References to chapters and parts of the device are in bold lettering, for example:

"Refer to 2. Safety", "turn the adjustment handle (05)"

• 0-255: Defines a range of values

• Notes: Note: (in bold lettering) is followed by useful information or tips

## 1.6. Symbols and Signal Words

Safety notes and warnings are indicated throughout the user manual by safety signs.

Always follow the instructions provided in this user manual.

DANGER Indicates an imminently hazardous situation which, if not avoided, will result in

death or serious injury.

**WARNING** Indicates a potentially hazardous situation which, if not avoided, could result in

death or serious injury.

**CAUTION** Indicates a potentially hazardous situation, which, if not avoided, may result in

minor or moderate injury.

Attention Indicates important information for the correct operation and use of the

product.

**Important** Read and observe the instructions in this document.

Electrical hazard

Eye damage hazard

Provides important information about the disposal of this product.

## 1.7. Symbols on the Information Label

This product is provided with an information label. The information label is located on the mounting bracket of the device.

The information label contains the following symbols:

This device shall not be treated as household waste.

P65 This device is rated IP65.

This device falls under IEC protection class I.

Read the user manual supplied with the device.

## 2. Safety

#### Important

Read and follow the instructions in this user manual before installing, operating or servicing this product.

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual.

## 2.1. Warnings and Safety Instructions

# DANGER Danger for children

For adult use only. The device must be installed beyond the reach of children.

• Do not leave various parts of the packaging (plastic bags, polystyrene foam, nails, etc.) within children's reach. Packaging material is a potential source of danger for children.

# DANGER Electric shock caused by dangerous voltage inside

There are areas within the device where dangerous touch voltage may be present.

- Do not open the device or remove any covers.
- Do not operate the device if the covers or the housing are open. Before operation, check if the housing is firmly closed and all screws are tightly fastened.
- Disconnect the device from electrical power supply before service and maintenance, and when the
  device is not in use.

## DANGER Electric shock caused by short-circuit

This device falls under IEC protection class I.

- Make sure that the device is electrically connected to ground (earth). Connect the device only to a socket-outlet with ground (earth) connection.
- Do not cover the ground (earth) connection.
- Do not bypass the thermostatic switch or fuses.
- Do not let the power cable come into contact with other cables. Handle the power cable and all connections with the mains with caution.
- Do not modify, bend, mechanically strain, put pressure on, pull or heat up the power cable.
- Make sure that the power cable is not crimped or damaged. Examine the power cable periodically for any defects.
- Do not immerse the device in water or other liquids. Do not install the device in a location where flooding may occur.
- Do not use the device during thunderstorms. Disconnect the device from the electrical power supply immediately.
- Keep the connectors sealed with the rubber caps when the connectors are not in use.
- Do not connect the cables from above the connectors, if the device is installed outdoors. Make a 'drip loop' in the cable so that rain water cannot enter the device.

#### WARNING Risk of epileptic shock

Strobe lighting can trigger seizures in photosensitive epilepsy. Sensitive persons should avoid looking at strobe lights.

# CAUTION Possible eye damage caused by high light intensity

Possibly hazardous optical radiation emitted from this device.

- Do not look at the operating light source. May be harmful to the eye.
- Do not look at the light source with optical instruments that may concentrate the light output.
- Make sure that persons are not looking directly into the light source when the device lights up suddenly. This can happen when the device is powered or when it receives DMX signal, or when certain menu items are selected.
- Disconnect power supply before servicing.
- Wear protective goggles if looking into light source during service or maintenance.

# Attention Power supply

- Before connecting the device to the power supply, make sure that the current, voltage and frequency match the input voltage, current and frequency specified on the information label on the device.
- Make sure that the cross-sectional area of the extension cords and power cables is sufficient for the required power consumption of the device.

### Attention General safety

- Do not connect the device to a dimmer pack.
- Do not switch the device on and off in short intervals. This decreases the device's life.
- Do not shake the device. Avoid brute force when installing or operating the device.
- Change the lens or the LEDs if they are visibly damaged to such an extent that their effectiveness is impaired, for example by cracks or deep scratches. Contact your Highlite International dealer for more information, as servicing can be performed only by instructed or skilled persons.
- If the device is dropped or struck, disconnect the device from the electrical power supply immediately.
- If the device is exposed to extreme temperature variations (e.g. after transportation), do not switch it on immediately. Let the device reach room temperature before switching it on, otherwise it may be damaged by the formed condensation.
- If the device fails to work properly, discontinue the use immediately.

Attention
For professional use only
This device shall be used only for the purposes it is designed for.

## Cameleon Spot 7 Q6

This device is designed to be used as a professional outdoor wall washer. Any incorrect use may lead to hazardous situations and result in injuries and material damage.

- This device is not suitable for households and for general lighting.
- This device is not designed for permanent operation.
- This device does not contain user-serviceable parts. Unauthorized modifications to the device will render the warranty void. Such modifications may result in injuries and material damage.

#### **Attention**

Before each use, examine the device visually for any defects.

#### Make sure that:

- All screws used for installing the device or parts of the device are tightly fastened and are not corroded.
- The safety devices are not damaged.
- There are no deformations on housings, fixations and installation points.
- The lens is not cracked or damaged.
- The power cables are not damaged and do not show any material fatigue.

#### **Attention**

Do not expose the device to conditions that exceed the rated IP class conditions.

This device is IP65 rated. IP (Ingress Protection) 65 class means that the device is dust-tight and protected against harmful effect of water jets.

## 2.2. Requirements for the User

This product may be used by ordinary persons. Maintenance may be carried by ordinary persons. Installation and service shall be carried out only by instructed or skilled persons. Contact your Highlite International dealer for more information.

Instructed persons have been instructed and trained by a skilled person, or are supervised by a skilled person, for specific tasks and work activities associated with the installation, service and maintenance of this product, so that they can identify risks and take precautions to avoid them.

Skilled persons have training or experience, which enables them to recognize risks and to avoid hazards associated with the installation, service and maintenance of this product.

Ordinary persons are all persons other than instructed persons and skilled persons. Ordinary persons include not only users of the product but also any other persons that may have access to the device or who may be in the vicinity of the device.

## 3. Description of the Device

The Showtec Cameleon Spot 7 Q6 Tour is a compact 7x 12 Watt RGBWA-UV LED spot with IP65 rating, suitable for indoor and outdoor applications. It is small enough to position inside a square truss as an up/down light, has a fixed 15° beam angle and features 0–100 % dimmer and 0–20 Hz strobe effects. The Cameleon Spot 7 Q6 Tour can be controlled manually via its OLED display with touch buttons, via DMX, Master/Slave and IR Remote in either Manual or Auto run mode with many available built-in programs. It has IP65-rated Seetronic Power Pro True and 3-pin XLR connectors and a bracket. An infrared remote and 40° beam shaper are optionally available.

## 3.1. Front View

## 3.3. Product Specifications

Cameleon Spot 7 Q6
100–240 V AC, 50/60 Hz
65 W

Physical:	
Dimensions:	226 x 164x 252 mm (L x W x H)
Weight:	3,3 kg

Optics:	
Light source:	7 x 12 W RGBWA-UV LEDs
Total luminous flux:	1850 lm
Red:	500 lm
Green:	800 lm
Blue:	195 lm
White:	725 lm
Amber:	575 lm
UV:	55 lm
Dimmer:	0–100 %
Strobe:	0–20 Hz
Beam Angle Circular:	15°
Refresh rate:	3000 Hz

Operation and control:	
Control:	Manual, Auto, Built-in programs, Master/Slave, DMX-512, RDM, Remote
DMX channels:	6, 8, 13 channels
Control panel:	OLED display and touch buttons

Connections:	
Power connections:	IP65-rated Power Pro True connectors IN/OUT
Data connections:	IP65-rated 3-pin DMX connectors IN/OUT
Signal pinouts:	Pin 1 (earth), pin 2 (-), pin 3 (+)

Construction:	
Housing:	Die-cast aluminum
Color:	Black
IP rating:	IP65
Cooling:	Convection

Thermal:	
Minimum ambient temperature:	-5 ℃
Maximum ambient temperature ta:	40 °C
Maximum housing temperature tc:	70 °C

Minimum distance:		
Minimum distance from flammable surfaces:	1 m	
Minimum distance to lighted object:	0,5 m	

## 3.4. Optional Accessories

You can additionally purchase the following accessories:

Product code: 44002 (Showtec UR-5 Universal IR Remote)

## 3.5. Dimensions

Fig. 04

## 4. Installation

## 4.1. Safety Instructions for Installation

#### **WARNING**

Incorrect installation can cause serious injuries and damage of property.

If trussing systems are used, installation must be carried out only by instructed or skilled persons.

Follow all applicable European, national and local safety regulations concerning rigging and trussing.

## 4.2. Personal Protective Equipment

During installation and rigging wear personal protective equipment in compliance with the national and site-specific regulations.

## 4.3. Installation Site Requirements

- The device can be used outdoors.
- The device can be mounted to a truss or other rigging structure.
- The minimum distance between the light output and the illuminated surface must be bigger than 0,5 m.
- The maximum ambient temperature  $t_a$  = 40 °C must never be exceeded.
- The relative humidity must not exceed 50 % with an ambient temperature of 40 °C.

## 4.4. Rigging

The device can be positioned on a flat surface (see Fig. 05) or mounted to a truss or other rigging structure in any orientation. Make sure that all loads are within the pre-determined limits of the supporting structure.

#### **CAUTION**

Restrict the access under the work area during rigging and/or derigging.

To mount the device, follow the steps below:

- 01) Use a clamp to attach the device to the supporting structure, as shown in Fig. 05. Make sure that the device cannot move freely.
- 02) Secure the device with a secondary suspension, for example a safety cable. Make sure that the secondary suspension can hold 10 times the weight of the device. If possible, the secondary suspension should be attached to a supporting structure independent of the primary suspension. Put the safety cable through the **safety eye (12)**, as shown in Fig. 06.

Clamp

## 4.4.1. Angle Adjustment

You can adjust the angle of the device with the 2 adjustment screws (01).

- 01) Turn the adjustment screws (01) counterclockwise to release it.
- 02) Tilt the device at the desired angle (see Fig. 07).
- 03) Turn the **adjustment screws (01)** clockwise to tighten it. Make sure that the device cannot move freely after the **adjustment screws (01)** is tightened.

Fig. 07

## 4.5. Connecting to Power Supply

# DANGER Electric shock caused by short-circuit

The device accepts AC mains power at 100–240 V and 50/60 Hz. Do not supply power at any other voltage or frequency to the device.

This device falls under IEC protection class I. Make sure that the device is always electrically connected to the ground (earth).

Before connecting the device to the socket-outlet:

- Make sure that the power supply matches the input voltage specified on the information label on the device.
- Make sure that the socket-outlet has ground (earth) connection.

Connect the device to the socket-outlet with the power plug. Do not connect the device to a dimmer circuit, as this may damage the device.

This device is IP65 rated.

- Do not expose the device to conditions that exceed the rated IP class conditions.
- Keep the connectors sealed with the rubber caps when the connectors are not in use.
- Do not connect the cables from above the connectors, if the device is installed outdoors. Make a 'drip loop' in the cable so that rain water cannot enter the device.
- Make sure that the cable run is not too heavy. A heavy cable run can cause damage to the connectors. If the connectors are damaged, their ingress protection (IP) can deteriorate.

## 4.6. Power Linking of Multiple Devices

This device supports power linking. Power can be relayed to another device via the power OUT connector. Note that the input and the output connectors have different designs: one type cannot be connected to the other.

Power linking of multiple devices must be carried out only by instructed or skilled persons.

#### **WARNING**

Incorrect power linking may lead to overload of the electrical circuit and result in serious injuries and damage of property.

To prevent overload of the electrical circuit, when power linking multiple devices:

- Use cables with sufficient current-carrying capacity. The power cable supplied with the device is not suitable for power linking of multiple devices.
- Make sure that the total current draw of the device and all connected devices does not exceed the rated capacity of the power cables and the circuit breaker.
- Do not link more devices on one power link than the maximum recommended number.

Maximum recommended number of devices:

- at 100–120 V: 6 devices
- at 200–240 V: 12 devices

## 5. Setup

## 5.1. Warnings and Precautions

# DANGER Electric shock caused by short-circuit

This device is IP65 rated.

- Do not expose the device to conditions that exceed the rated IP class conditions.
- Keep the connectors sealed with the rubber caps when the connectors are not in use.
- Do not connect the cables from above the connectors, if the device is installed outdoors. Make a 'drip loop' in the cable so that rain water cannot enter the device.
- Make sure that the cable run is not too heavy. A heavy cable run can cause damage to the connectors. If the connectors are damaged, their ingress protection (IP) can deteriorate.

#### Attention

Connect all data cables before supplying power.

Disconnect power supply before connecting or disconnecting data cables.

## 5.2. Stand-alone Setup

When the Cameleon Spot 7 Q6 is not connected to a controller or to other devices, it functions as a stand-alone device.

For more information about the control modes, refer to 6.2. Control Modes on page 20.

#### 5.3. DMX Connection

### 5.3.1. DMX-512 Protocol

You need a DMX serial data link to run light shows of one or more devices using a DMX-512 controller or to run synchronized shows of two or more devices set in a master/slave control mode.

The Cameleon Spot 7 Q6 has 3-pin DMX signal IN and OUT connectors.

The pin assignment is as follows: pin 1 (ground), pin 2 (-), pin 3 (+).

Devices on a serial data link must be daisy-chained in a single line. The number of devices that you can control on one data link is limited by the combined number of the DMX channels of the connected devices and the 512 channels available in one DMX universe.

To comply with the TIA-485 standard, no more than 32 devices should be connected on one data link. In order to connect more than 32 devices on one data link, you must use a DMX optically isolated splitter/booster, otherwise this may result in deterioration of the DMX signal.

#### Note:

- Maximum recommended DMX data link distance: 300 m
- Maximum recommended number of devices on a DMX data link: 32 devices

#### 5.3.2. DMX Cables

Shielded twisted-pair cables with 3-pin XLR connectors must be used for reliable DMX connection. You can purchase DMX cables directly from your Highlite International dealer or make your own cables.

If you use XLR audio cables for DMX data transmission, this may lead to signal degradation and unreliable operation of the DMX network.

When you make your own DMX cables, make sure that you connect the pins and wires correctly as shown in Fig. 08.

Fig. 08

## 5.3.3. Master/Slave Setup

The Cameleon Spot 7 Q6 supports master/slave control mode. To connect multiple devices in a master/slave setup, follow the steps below:

- 01) Connect the first device's DMX OUT connector to the second device's DMX IN connector.
- 02) Repeat step 1 to connect all devices as shown in Fig. 09.
- 03) Connect a DMX terminator (120  $\Omega$  resistor) to the DMX OUT connector of the last device in the setup.
- 04) Set the first device on the data link as a master device. See **6.6.5**. **Master/Slave Mode** on page 27 for more information.
- 05) Set the remaining devices to slave mode. See **6.6.5**. **Master/Slave Mode** on page 27 for more information.

Fig. 09

#### 5.3.4. DMX Linking

To connect multiple devices on one DMX data link, follow the steps below:

- 01) Use a 3-pin DMX cable to connect the DMX OUT connector of the lighting controller to the DMX IN connector of the first device.
- 02) Connect the first device's DMX OUT connector to the second device's DMX IN connector with a 3-pin DMX cable.
- 03) Repeat step 2 to connect all devices in a daisy-chain as shown in Fig. 10.
- 04) Connect a DMX terminator (120  $\Omega$  resistor) to the DMX OUT connector of the last device on the data link

Fig. 10

#### 5.3.5. DMX Addressing

In a setup with multiple devices, make sure that you set the DMX starting address of each device correctly. The Cameleon Spot 7 Q6 has 3 personalities: 6, 8 or 13 channels.

If you want to connect multiple devices on one data link and use them in 13-channel mode, for example, follow the steps below:

- 01) Set the starting address of the 1st device on the data link to 1 (001).
- 02) Set the starting address of the  $2^{nd}$  device on the data link to 14 (014), as 1 + 13 = 14.
- 03) Set the starting address of the  $3^{rd}$  device on the data link to 27 (027), as 14 + 13 = 27.
- 04) Continue assigning the starting addresses of the remaining devices by adding each time 13 to the previous number.

Make sure that you do not have any overlapping channels in order to control the Cameleon Spot 7 Q6 correctly. If two or more devices are addressed similarly, they will work similarly.

## 6. Operation

## 6.1. Safety Instructions for Operation

#### **Attention**

This device must be used only for the purposes it is designed for.

This device is intended for professional use as an outdoor wall washer. It is not suitable for households and for general lighting.

Any other use, not mentioned under intended use, is regarded as non-intended and incorrect use.

# Attention Power supply

Before connecting the device to the power supply, make sure that the current, voltage and frequency match the input voltage, current and frequency specified on the information label on the device.

#### 6.2. Control Modes

The Cameleon Spot 7 Q6 can be operated with a DMX controller, or without a DMX controller as a standalone device or in a master/slave setup.

The Cameleon Spot 7 Q6 supports the following control modes:

Stand-alone: Manual, Auto, Built-in programs
 Master/Slave: Manual, Auto, Built-in programs

DMX-512, RDM
 6, 8, 13 channels

For more information about how to connect the devices, refer to **5. Setup** on pages 17–19.

To operate the device manually as a stand-alone device or in a master/slave setup:

Adjust the colors in Manual menu. See 6.6.2. Manual Mode on page 25 for more information.

To run the built-in programs without a DMX controller:

- 01) Select one of the 16 built-in programs in Program menu. See **6.6.4. Program** on page 26 for more information. Adjust the program speed and strobe frequency.
- 02) Run all built-in programs in a sequence in Auto menu. See **6.6.3. Auto** on page 26 for more information.

To run the preset colors without a DMX controller:

Select one of the 33 preset colors in Program menu. See **6.6.4.1. Program 01** on page 27 for more information.

To operate the device with a DMX controller:

- 01) Set the DMX starting address of the device in Address menu. See **5.3.5. DMX Addressing** on page 19 and **6.6.1.1. Address** on page 25.
- 02) Select the DMX channel mode. See **6.6.1.2. Channels** on page 25 for more information. See **6.7. DMX Channels** on pages 33–34 for complete overview of all DMX channels.

## 6.3. Control Panel

- A) OLED display
- B) DOWN button
- C) UP button
- D) SET button
- E) MODE button

- Use the MODE button to exit the current submenu and to return to the Main Menu.
- Use the UP/DOWN buttons to navigate through the menus or to increase/decrease numeric values.
- Use the **SET** button to open the desired menu, to confirm your choice or to set the currently selected value.

## 6.4. Start-up

Upon start-up the display briefly shows its software version and current temperature.

#### Note:

If no button is touched after 30 seconds of inactivity, the display shows the start screen: Touch any button to return to the main menu.

By default the display is locked. To access the main menu, you need to enter the **password**. Touch and hold the **MODE** and **SET** buttons for 3 seconds to unlock the display. See **6.6.6.7**. **Lock** on page 31 for more information.

## 6.5. Menu Overview

## Cameleon Spot 7 Q6

## 6.6. Main Menu Options

Upon start-up, the display shows the current software version and the temperature.

The main menu has the following options:

- Touch the UP/DOWN buttons to navigate through the main menu.
- Touch the SET button to open the submenus.

#### Note:

By default the display is locked. To access the main menu, you need to enter the **password**. Press and hold down the **MODE** and **SET** buttons for 3 seconds to unlock the display. See **6.6.6.7 Lock** on page 31 for more information.

#### 6.6.1. DMX Settings

In this menu you can set the DMX address and select the desired DMX channel mode.

- 01) While in the main menu, touch the **UP/DOWN** buttons to select DMX.
- 02) Touch the **SET** button to enter the menu. The display shows:

- 03) Touch the **UP/DOWN** buttons to select one of the 2 submenus:
  - ADDRESS
  - CHANNELS
- 04) Touch the SET button to open the desired submenu.

#### 6.6.1.1. Address

In this menu you can set the desired DMX starting address.

- 01) Touch the **UP/DOWN** buttons to set the desired DMX address. The adjustment range is 001–512.
- 02) Touch the **SET** button to confirm.

#### 6.6.1.2. Channels

In this menu you can set the desired DMX channel mode.

- 01) Touch the **UP/DOWN** buttons to set the desired DMX channel mode. Select one of the 3 options:
  - 6 channels
  - 8 channels
  - 13 channels
- 02) Touch the **SET** button to confirm.

#### 6.6.2. Manual Mode

In this menu you can manually set the desired colors.

- 01) While in the main menu, touch the **UP/DOWN** buttons to select MANUAL.
- 02) Touch the **SET** button to enter the menu. The display shows:

1) <b>Red:</b>	000
2) Green:	000
3) Blue:	000
4) White:	000
5) Amber:	000
6) UV:	000

- 03) Touch the UP/DOWN buttons to select one of the 6 colors: Red, Green, Blue, White, Amber and UV.
- 04) Touch the **SET** button to enter the menu.
- 05) Touch the **UP/DOWN** buttons to set the LED brightness. The adjustment range for each color is 0–255, from dark to brightest.
- 06) Touch the **SET** button to save your settings. You can combine Red, Green, Blue, White, Amber and UV to create an infinite range of colors (0–255).

#### 6.6.3. Auto

In this menu you can set Auto mode.

- 01) While in the main menu, touch the **UP/DOWN** buttons to select AUTO.
- 02) Touch the **SET** button to enter the menu. The display shows:

- 03) Touch the **UP/DOWN** buttons to select YES (to start the auto show) or NO (to return to the previous screen.
- 04) Touch the **SET** button to confirm.

## 6.6.4. Program

In this menu you can set the built-in programs and color presets.

- 01) While in the main menu, touch the UP/DOWN buttons to select PROGRAM.
- 02) Touch the **SET** button to enter the menu. The display shows:

03) Touch the **UP/DOWN** buttons to select MODE and touch the **SET** button to enter the menu. The display shows:

04) Touch the **UP/DOWN** buttons to select one of the 16 built-in programs. Touch the **SET** button to confirm.

#### 6.6.4.1. Program 01

01) If you select program 01, the display shows:

- 02) Touch the **UP/DOWN** buttons to select one of the 2 options:
  - COLOR
  - STROBE
- 03) Touch the **SET** button to enter the desired menu.
- 04) If you select COLOR, touch the **UP/DOWN** buttons to select one of the 33 color macros. Touch the **SET** button to save your settings.
- 05) If you select STROBE, touch the **UP/DOWN** buttons to set the strobe frequency. The adjustment range is between 0–99, from OFF to high frequency. Touch the **SET** button to save your settings.

#### 6.6.4.2. Programs 02-16

01) If you select one of the programs 02–16, the display shows:

- 02) Touch the **UP/DOWN** buttons to select one of the 2 options:
  - SPEED
  - STROBE
- 03) Touch the SET button to enter the desired menu.
- 04) If you select SPEED, touch the **UP/DOWN** buttons to set the built-in program's speed. The adjustment range is 1–100, from slow to fast. Touch the **SET** button to save your settings.
- 05) If you select STROBE, touch the **UP/DOWN** buttons to set the strobe frequency. The adjustment range is 0–99, from OFF to high frequency. Touch the **SET** button to save your settings.

#### 6.6.5. Master/Slave Mode

In this menu you can set the device as a slave.

- 01) While in the main menu, touch the **UP/DOWN** buttons to select SLAVE.
- 02) Touch the **SET** button to enter the menu. The display shows:

- 03) Touch the **UP/DOWN** buttons to select YES or NO.
- 04) Touch the **SET** button to confirm.
- 05) If you select YES, the device will be set as a slave and reacts the same as the master device.

#### 6.6.6. Settings

In this menu you can adjust the settings of the device.

- 01) While in the main menu, touch the **UP/DOWN** buttons to select SETTINGS.
- 02) Touch the **SET** button to enter the menu. The display shows:
  - 1) Curves Select
  - 2) Dimmer Speed
  - 3) Display
  - 4) PWM Frequency
  - 5) DMX Fail
  - 6) Backlight Time
  - 7) Lock
  - 8) Key Backlight
  - 9) Factory

03) Touch the **UP/DOWN** buttons to select one of the 9 submenus:

CURVES SELECT: See 6.6.6.1. Curves Select
 DIMMER SPEED: See 6.6.6.2. Dimmer Speed
 DISPLAY: See 6.6.6.3. Display invert
 PWM FREQUENCY: See 6.6.6.4. PWM Frequency

• DMX FAIL: See 6.6.6.5. DMX Fail

• BACKLIGHT TIME: See 6.6.6.6. Backlight Time

• LOCK: See **6.6.6.7**. **Lock** 

• KEY BACKLIGHT: See 6.6.6.8. Key Backlight

• FACTORY: See 6.6.6.9. Factory

04) Touch the **SET** button to enter the desired submenu.

#### 6.6.6.1. Curves Select

In this menu you can set the dimming curves.

- 01) Touch the **UP/DOWN** buttons to select one of the 4 dimming curves.
- 02) Touch the **SET** button to confirm.

## 6.6.6.2. Dimmer Speed

In this menu you can set the dimmer speed.

- 01) Touch the **UP/DOWN** buttons to select FAST or SMOOTH.
- 02) Touch the **SET** button to confirm.

#### 6.6.6.3. Display Invert

In this menu you can set the orientation of the display.

- 01) Touch the **UP/DOWN** buttons to select one of the 2 options:
  - NORMAL Normal orientation of the OLED display
  - INVERT The OLED display is rotated by 180°
- 02) Touch the SET button to confirm.

#### 6.6.6.4. PWM Frequency

In this menu you can adjust the PWM (Pulse Width Modulation) frequency.

- 01) Touch the **UP/DOWN** buttons to select one of the 4 options:
  - 12K
  - 6K
  - 3K
  - 1K
- 02) Touch the SET button to confirm.

## 6.6.6.5. DMX Fail

In this menu you can set the behavior of the device in case of a DMX failure.

- 01) Touch the **UP/DOWN** buttons to select one of the 4 options:
  - OFF: The device blacks out the light output
  - HOLD: The device uses the last received DMX signal, ensuring undisrupted performance
  - MANUAL: The device switches to Manual mode
  - PROGRAM: The device runs the built-in programs
- 02) Touch the **SET** button to confirm.

#### 6.6.6.6. Backlight Time

In this menu you can select whether the backlight of the display remains on or set the time for the display to turn off after inactivity.

- 01) Touch the **UP/DOWN** buttons to select one of the 5 options:
  - 5S: The backlight of the LCD display turns off after 5 seconds of inactivity
  - 10S: The backlight of the LCD display turns off after 10 seconds of inactivity
  - 20S: The backlight of the LCD display turns off after 20 seconds of inactivity
  - 30S: The backlight of the LCD display turns off after 30 seconds of inactivity
  - On: The backlight of the LCD display remains on
- 02) Touch the **SET** button to confirm.

#### 6.6.6.7. Lock

In this menu you can set the safety lock, restricting access to the main menu.

- 01) Touch the **UP/DOWN** buttons to select one of the 2 options:
  - ON: when no button is pressed within 30 seconds, the main menu is locked.
     In order to unlock it, press and hold down the MODE and SET buttons for 3 seconds.
  - OFF: safety lock is inactive
- 02) Touch the SET button to confirm.

## 6.6.6.8. Key Backlight

In this menu you can set whether the 4 buttons (MODE, SET, UP, DOWN) are illuminated or not.

- 01) Touch the UP/DOWN buttons to select ON or OFF.
- 02) Touch the **SET** button to confirm.

## 6.6.6.9. Factory

In this menu you can restore the default factory settings.

- 01) Touch the **UP/DOWN** buttons to select YES or NO.
- 02) Touch the **SET** button to confirm.

#### 6.6.7. Information

In this menu you can view the current software version, temperature, total lifetime and the UID (RDM code of the device).

- 01) While in the main menu, touch the **UP/DOWN** buttons to select INFORMATION.
- 02) Touch the **SET** button to enter the menu. The display shows:

Version:1.0 Temperature:38°C Life Time:00026h UID:29B40CFE5A72

The RDM code is: 29B4:0CFxxxxx.

## 6.7. DMX Channels

## 6.7.1. 6 Channels, 8 Channels, 13 Channels

6 CH	8 CH	13 CH	Function	Value	Setting

				232–255	PWM frequency: 12 kHz		

#### Note:

- Make sure that Master Dimmer channel is open, to see the light output.
- Make sure that Color Presets or Built-in Programs or Red, Green, Blue, White, Amber and UV channels are open, if you want to use Linear or Pulse Strobe channels.
- Make sure that Color Presets and Built-in Programs channels are closed, if you want to use Red, Green, Blue, White, Amber or UV channels.
- Make sure that Built-in Programs channel is closed, if you want to use Color Presets channel.
- Make sure that Built-in Programs channel is open, if you want to use Program Speed channel.
- Make sure that Pulse Strobe channel is closed, if you want to use Linear Strobe channel.

## 6.8. RDM Information

This device supports RDM. Refer to 6.8.2. Supported RDM PIDs (Parameter IDs) for more information.

#### 6.8.1. RDM Details

Responder: 29B4:0CFxxxxx

Manufacturer's ID: Showtec (Highlite International B.V.)

Manufacturer Label: Showtec

Model Description: Cameleon Spot 7Q6

Model ID: 207

Device Label: Cameleon Spot 7Q6

## 6.8.2. Supported RDM PIDs (Parameter IDs)

Parameter ID	Value	Required	GET	SET
SUPPORTED_PARAMETERS	0x0050	*	*

## 6.8.3. Highlite RDM Details

All Highlite RDM responder IDs are divided into 3 parts, starting with a 4-digit Manufacturer's ID, followed by a 3-digit Model ID, and a 5-digit unique ID for each item.

As a result, RDM responder IDs will always start with the same 7 digits (exclusive to each type of device). The last 5 digits will be different for each device.

#### 6.9. Remote Control

The device can be controlled with an IR remote control (44002).

# DANGER Do not ingest battery, chemical burn hazard

The remote control contains a coin cell battery. If the coin cell battery is swallowed, it can cause severe internal burns in just 2 hours and can lead to death.

The battery is already installed in the remote control. It is protected against discharge by a transparent plastic foil. Remove the plastic foil before using the remote control for the first time.

When replacing the battery, make sure that the polarity is correct. Incorrect polarity may damage the remote control.

You can control several devices at the same time with the remote control. Make sure that you point the remote control to the **infrared sensor (05)** of the device or group of devices that you want to control, as shown in Fig. 12. If you point the remote control to the **infrared sensor (05)** of the device outside of the range of the sensor, the device will not respond to the remote control (Fig. 13).

Fig. 12

Fig. 13

# Cameleon Spot 7 Q6

To operate the device with the IR remote control, point the remote control to the infrared sensor (05).

#### Note

The remote control will work only if the device is already operating in Auto, Built-in Programs or Manual mode.

The remote control has the following functions:

Fig. 14

#### Note:

When you turn off the device, the next time you turn it on, it will continue to operate in the previously selected operation mode.

Button	Function	Description
ON/OFF	On/Off	Turns the LEDs on/off
AUTO	Auto	Activates Auto mode
PRG	Program	Activates Built-in Programs mode
SOUND	No function	
SPEED	Speed	Activates program speed adjustment
STROBE	Strobe	Activates strobe frequency adjustment
Dimming	Dimming	Activates Manual mode
(+)	Plus	Increase value
<u> </u>	Minus	Decrease value

# Cameleon Spot 7 Q6

Button	Function	Description

(8)	Color 6 (light yellow)	Activates color 6 (R 255; G 255; B 000; W 000)
9	Color 31 (warm white)	Activates color 31 (R 075; G 075; B 000; W 255)
	20101 01 (11/011111 11/11110)	7.0117.01.03.00.01.01.07.07.07.07.07.07.07.07.07.07.07.07.07.

#### 6.9.1. Auto

Press the button to activate Auto mode. The device runs its built-in programs in a sequence.

#### 6.9.2. Built-in Programs

- 01) Press the button to activate Built-in Programs mode.
- 02) Press the + and buttons to select one of the 16 built-in programs.

#### 6.9.2.1. Color Presets

- 01) Press the 1 9 buttons to select the color presets.
- 02) Press the + and buttons to select one of the 33 color presets.

#### 6.9.2.2. Strobe

- 01) Press the strobe frequency.
- 02) Press the distributions to increase/decrease the strobe frequency. The adjustment range is 0–99, from OFF to high strobe frequency.

### Cameleon Spot 7 Q6

### 6.9.2.3. Program Speed

01) Press the button to set the program speed.

02) Press the day and buttons to increase/decrease the program speed. The adjustment range is 1–100, from slow to fast.

#### Note:

If you select program 1 and start adjusting the program speed, the device automatically switches to program 2. It is because the program speed function is available only in programs 2–16. The device searches for and activates the first following program that has the program speed function.

#### 6.9.3. Manual

01) Press the button to activate Manual mode.

02) Press the R, G, B, W, A, 0 button to select one of the RGBWA-UV colors.

03) Press the doubt and buttons to set the LED brightness of the selected color. The adjustment range is 0–255. You can combine Red, Green, Blue, White, Amber and UV to create an infinite range of colors.

# 7. Troubleshooting

This troubleshooting guide contains solutions to problems which can be carried out by an ordinary person. The device does not contain user-serviceable parts.

Unauthorized modifications to the device will render the warranty void. Such modifications may result in injuries and material damage.

Refer servicing to instructed or skilled persons. Contact your Highlite International dealer in case the solution is not described in the table.

Problem	Probable cause(s)	Solution
The device does not	No power to the device	Check if power is switched on and cables are plugged in
function at all	Internal fuse is blown	Disconnect the device and contact your Highlite International dealer
The device responds erratically	The factory settings of the device are changed	<ul> <li>Reset the device's parameters to the default factory settings. See 6.6.6.9.</li> <li>Factory on page 32</li> </ul>
The device does not respond to DMX control	The controller is not connected The signal is reversed. The 3-pin DMX OUT of the controller does not match the DMX IN of the device	<ul> <li>Connect the controller</li> <li>Install a phase-reversing cable between the controller and the device</li> </ul>
	The controller is defective	Try using another controller
	Bad data link connection	Examine connections and cables.     Correct poor connections. Repair or replace damaged cables
The device responds erratically to DMX	The data link is not terminated with a 120 $\Omega$ termination plug	<ul> <li>Insert a termination plug in the DMX OUT connector of the last device on the link</li> </ul>
control	Incorrect addressing	Check address settings and correct, if necessary
	In case of a setup with multiple devices, one of the devices is defective and disturbs data transmission on the link	To find out the defective device, bypass one device at a time until normal operation is restored
The device does not respond to the remote control	The remote control is outside of the range of the sensor of the infrared port	<ul> <li>Walk closer to the device or change the angle at which you point the remote control to the device. See</li> <li>6.9. Remote Control on page 36</li> </ul>
Terriore corniror	The battery of the remote control is depleted	Change the battery of the remote control
No light or LEDs cut	LEDs are damaged	Disconnect the device and contact your Highlite International dealer
out intermittently	The power supply settings do not match local AC voltage and frequency	Disconnect the device. Check the settings and correct, if necessary

### 8. Maintenance

### 8.1. Safety Instructions for Maintenance

**DANGER** 

Electric shock caused by dangerous voltage inside

Disconnect power supply before servicing or cleaning.

#### 8.2. Preventive Maintenance

Attention

Before each use, examine the device visually for any defects.

#### Make sure that:

- All screws used for installing the device or parts of the device are tightly fastened and are not corroded.
- The safety devices are not damaged.
- There are no deformations on housings, fixations and installation points.
- The lens is not cracked or damaged.
- The power cables are not damaged and do not show any material fatigue.

#### 8.2.1. Basic Cleaning Instructions

The external lens of the device must be cleaned periodically in order to optimize the light output. The cleaning schedule depends on the conditions at the site where the device is installed. When smoke or fog machines are used at the site, the device will need more frequent cleaning. On the other hand, if the device is installed in well-ventilated area, it will need less frequent cleaning. To establish a cleaning schedule, examine the device at regular intervals during the first 100 hours of operation.

To clean the device, follow the steps below:

- 01) Disconnect the device from the electrical power supply.
- 02) Allow the device to cool down for at least 15 minutes.
- 03) Remove the dust collected on the external surface with dry compressed air and a soft brush.
- 04) Clean the lens with a damp cloth. Use a mild detergent solution.
- 05) Dry the lens carefully with a lint-free cloth.
- 06) Clean the DMX and other connections with a damp cloth.

#### **Attention**

- Do not immerse the device in liquid.
- Do not use alcohol or solvents.
- Make sure that the connections are fully dry before connecting the device to the power supply and to other devices.

#### 8.2.2. Draining Condensation Water

The Cameleon Spot 7 Q6 is IP65 rated. The device can resist water jets. If the device is exposed to extreme humid conditions during servicing, condensation may collect inside the device. This can happen also during transportation, if the device is exposed to extreme temperature variations.

If condensation water collects inside the device, follow the steps bellow to remove the condensation water:

01) Carefully remove the **protective valve (11)** with a wrench (16 mm).

Fig. 15

- 02) Let the device operate at full output for 60 minutes.
- 03) Let the device cool down for 30 minutes.
- 04) Install the protective valve (11) back in place. Make sure that you do not overtighten it.

#### 8.3. Corrective Maintenance

The device does not contain user-serviceable parts. Do not open the device and do not modify the device.

Refer repairs and servicing to instructed or skilled persons. Contact your Highlite International dealer for more information.

# 9. Deinstallation, Transportation and Storage

#### 9.1. Instructions for Deinstallation

#### WARNING

Incorrect deinstallation can cause serious injuries and damage of property.

- Let the device cool down before dismounting.
- Disconnect power supply before deinstallation.
- Always observe the national and site-specific regulations during deinstallation and derigging of the device.
- Wear personal protective equipment in compliance with the national and site-specific regulations.

#### 9.2. Instructions for Transportation

- Use the original packaging to transport the device, if possible.
- Always observe the handling instructions printed on the outer carton box, for example: "Handle with care", "This side up", "Fragile".

### 9.3. Storage

- Clean the device before storing. Follow the cleaning instructions in chapter 8.2.1. Basic Cleaning Instructions on page 41.
- Store the device in the original packaging, if possible.

### 10. Disposal

#### Correct disposal of this product

Waste Electrical and Electronic Equipment

This symbol on the product, its packaging or documents indicates that the product shall not be treated as household waste. Dispose of this product by handing it to the respective collection point for recycling of electrical and electronic equipment. This is to avoid environmental damage or personal injury due to uncontrolled waste disposal. For more detailed information about recycling of this product contact the local authorities or the authorized dealer.

# 11. Approval

### UK CA

Check the respective product page on the website of Highlite International (<u>www.highlite.com</u>) for an available declaration of conformity.
